Purpose. To work in a challenging, fast-paced environment using my leadership and experience to develop controls that will enable users to securely communicate in their networked environment. I am uniquely qualified to develop, implement, train and maintain secure networking environments because of my Cisco, Microsoft and Information Security training, certification and military and civilian experience.

#### Career Summary

Network auditor and information assurance officer, CISSP at Wells Fargo leading:

- Security process development and implementation

- Placement of control measures to mitigate threats and nullify risks

- Creation of systems that organically discover and manage threats

- Development of frontline risk management in all team members and customers

Certified Wide-Area Network Engineer and Chief Information Officer leading:

- Process development and implementation

- Wide and local area voice and data network design and installation (incl. wireless)

- Encourages collaboration, inclusion, candor, excels in building trust in diverse teams

- Compliance/Quality Assurance incl ITIL, Payment Card Industry (PCI) and Sarbanes-Oxley

- Information assurance and security design, implementation, and risk management

- Capacity management including supply chain and logistical delivery

- Change control including configuration, testing and release management

- Training management including certification and professional development

- Logistical, life-cycle, supply chain management for parts, upgrades, and disposal/return

Customer Relationship Management including database, sales, satisfaction, metrics

Client-server, web-based applications, libraries, archives and databases

Linux/UNIX and Windows systems integration and network administration

TS/SSBI Clearance with SCI Access, expired 2014.

Tactical communicator building global data, voice, radio, telecommunications networks

30 years' service Army Signal, Intelligence and Civil Affairs Corps

#### Relevant Civilian Experience:

Network and Security Project Manager, Lightlearn, LLC

July 2017-Present

Installed security cameras, refreshed LAN, installed and configured security software and new financial management system for the Irish Cultural Center in San Francisco.

Created security policies and trained club management how to monitor system errors and respond to notifications.

Trained customers in management and use of the tools and applications.

Volunteer-Veteran Outreach with the American Legion, Association of the US Army, Disabled American Veterans and Veterans of Foreign Wars:

Developed career pathways (On-Ramps) for Veterans to enter careers in technology. On-Ramps have introductory material, vendor specific curriculum, mentorship, interview skills, resume preparation and other services to bring the Veteran to "career-ready" status.

Helped 20 Veterans gain certification and jobs in Salesforce CRM.

Completed a Microsoft CRM Dynamics project with 9 Veteran candidates.

Planned and executed 8 Northern California career fairs with public and private partners.
